REQUEST A COVERAGE SURVEY

Tell us the type of business, number of rooms or seats, expected users, distance, floors, outdoor areas and desired speed. We will prepare a proposal, contract and invoice before installation.

MAKEPE / RHONE POULENC

HQ: Makepe, Rhone Poulenc - SOFFO L building. Route 1: after Dolce Vita Palacio Guest House, past Afriland First Bank Makepe. Route 2: after HAPPY Sport, by the pool entrance toward the paved road.

Scan for plans and a detailed request form

Priority prospecting area: approximately 50 m to 1 km around the Makepe HQ, subject to a site survey.

IMPORTANT SERVICE CONDITIONS

Rates shown are indicative as of 06 Sep 2026. Business subscriptions normally start at 25,000 FCFA/month; the 20,000 FCFA option is limited to eligible light-use sites. Invoice due date is the end of the month unless the signed contract states otherwise. Proposal, contract and invoice are signed and paid before installation, except where ATLAS agrees otherwise in writing. Rain can reduce satellite speed; wind, power issues, ENEO/civil work, damaged cable, interference and third-party infrastructure can interrupt service. Redundant links and backup power reduce risk but do not guarantee uninterrupted service. ATLAS will diagnose and schedule remote or on-site repair according to technician availability and site access. Fees for completed services and delivered equipment are generally non-refundable to the extent permitted by applicable law; negotiated remedies must be written. Equipment reported defective within 30 days is inspected before replacement; accidental damage, staff action, negligence, lightning, water or misuse are excluded. After 30 days, manufacturer warranty and applicable law govern; replacement equipment may be chargeable. Actual Wi-Fi speed depends on backhaul, distance, obstacles, interference, device capability and concurrent users. Client-authorized media only may be loaded on a local media server. Taxes, civil work, unusual mounting, travel and extra equipment are included only when stated in the signed quote.

TP-Link | Tenda | Ubiquiti | Grandstream

Names and marks belong to their respective owners. Display indicates compatible capability and does not imply endorsement, partnership or certification.

MTN MoMo | Orange Money | USDT / TRX | Bitcoin

Payment options: MTN MoMo, Orange Money, USDT (TRX) and Bitcoin, subject to the invoice and payment instructions issued by ATLAS.

ATLAS OSPREY is a service family of ETS ATLAS NETWORKS. An initiative of BMWINGS Interactive.

ONE LINK. THE WHOLE BUSINESS.

We bring the internet link to your site, extend it by optical fibre or a surveyed network link, place indoor or outdoor Wi-Fi where people actually use it, and remain available when the connection needs attention.

Choose the operating level

ENTRY

20,000

FCFA / month

Up to 10 Mbps where technically eligible. Best for a small, light-use site; not the standard business package.

BUSINESS

25,000

FCFA / month

Up to 25 Mbps. A practical starting point for restaurants, guest houses and everyday business use.

BUSINESS+

35,000+

FCFA / month

Above 30 Mbps after survey. Built for remote work and heavier use, with 24/7 support access.

Installation and equipment

- Under 50 m: from 85,000 FCFA.
- 50-100 m: surveyed and quoted.
- Above 100 m: from 150,000 FCFA.
- Outdoor access points can reach up to 300 m in suitable line-of-sight conditions; walls, trees, interference and device quality change real coverage.
- Equipment may include TP-Link, Tenda, Ubiquiti or Grandstream routers/access points, selected for the site.

Installation from 85,000 FCFA | 25,000 FCFA / month

Quote controls scope, taxes, hardware, travel and civil work.

Why guest Wi-Fi sells

- Guests stay longer and are more likely to return.
- Remote workers can book, meet, order and pay with confidence.
- A branded welcome portal reinforces your name at every connection.
- Free Wi-Fi signs and QR access make the service visible before customers sit down.
- Managed access separates guests from staff systems and makes troubleshooting clearer.

What weak internet costs

Lost bookings and orders; failed calls and payments; poor reviews; staff using personal hotspots; guests leaving early; unmanaged passwords; dead zones around pools, rooms and terraces.

ATLAS managed Wi-Fi vs a standard home box

POINT	ATLAS MANAGED	STANDARD HOME BOX
Coverage	Surveyed AP placement across the venue	Depends mainly on box placement and local signal
Distribution	Optical/network link plus indoor or outdoor APs	Usually one consumer router
Resilience	Multiple backhaul paths and backup power available	Depends on the selected provider/site
Support	Remote or on-site; 24/7 access on 35k+ plans	Provider's standard support path

MTN and Orange Home offers are examples of standard consumer connectivity. Their plans and coverage change. This compares service models, not a claim that another provider is always unavailable.

More than internet: Branded hotspot portals | Guest Wi-Fi QR signs | Satellite installation | Business networking | Remote and on-site troubleshooting | Hotel LAN media servers for client-authorized content
